# IQ Made with emotions

"IQ Made With Emotions", a way of understanding our materials and their possibilities. We want to show you our history, where we come from and where we are going to through a journey in which you will discover that innovation and development are a fundamental part of our company.

# Sign of Perfection

It has been forty years since we defined COMPAC's mission: to imagine, design and create surfaces that inspire people's life and to set a trend in the world of design. Today we keep giving the best of ourselves to become the reference point for design lovers that know about appreciating beauty and looking for something unique.

Our Unique collection is inspired by the properties of natural rock to then go beyond all your expectations. It is the fruit of the constant effort to always offer an innovative product by creating decorative surfaces with unsurpassed technical characteristics.

Forty years is a long time but we keep looking to the future, establishing and reaching impossible goals, while

not only transforming the materials we work with but also the lives of the people that interact with them.

We know there is always room for improvement and that is why we never stop. The only way to make a better world is to dream of a perfect one.

UNIQUE Collection

# Perfecting Nature

Nothing is perfect, it is said. Excellence is utopia...  
But all we have to do is looking around us and seeing  
the perfection present all over the planet.

Our Unique collection imbibes the nectar, the beauty of nature. It is born from total respect and admiration for the forms, materials and textures of the earth.

Our creations are inspired by lakes, forests, rocks, mountain scenes to build something totally new and unique.

Only when you truly understand nature's perfection, wisdom and greatness, you are able to start conceiving something more than that.

This is how we place all our knowledge acquired over the years at the service of the purest raw materials, ensuring that the end product will be even more perfect than nature.

In our manufacturing processes we give our stone a series of new properties, which are better adapted to daily human needs: impermeability, hardness, resistance. We preserve the original values while enhancing them thanks to our creativity.
